Position Profile

General information	
Job Title	Mobile Application Developer
Company	Gill
Department	Research & Development

Position summary

Gill Group R&D is the product design and innovation hub behind the Gill businesses. With broad engineering capabilities and unique technical expertise in measurement technologies, we deliver products that solve the market's most challenging problems.

We are seeking a highly skilled Application Developer to take a lead role in planning, executing, and successfully delivering mobile application development projects. This role will focus on maintaining and developing new applications, features, and capabilities for Gill mobile platforms.

Main duties

- Develop, test, and deploy mobile applications using React Native.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Write clean, efficient, and well-documented code.
- Implement and optimize user interfaces and user experiences.
- Integrate with third-party APIs and services.
- Troubleshoot, debug, and resolve performance bottlenecks.
- Stay current with React Native and mobile development trends.
- Participate in code reviews and contribute to best practices.

Candidate requirements

- Proficiency in JavaScript and the React ecosystem.
- Strong experience with React Native for cross-platform mobile development.
- Familiarity with version control systems (e.g., Git).
- Understanding of native mobile development (iOS and Android).
- Experience with Microsoft application development is a plus.
- Ability to work independently and collaboratively.
- Experience with testing frameworks is a plus.
- Knowledge of UI/UX principles and responsive design.
- Familiarity with Bluetooth communications.
- Strong problem-solving and analytical skills.
- Excellent communication, ability to work independently and as part of a team.

Additional advantageous experience

- Certifications in mobile development
- UI/UX principles and responsive design

Person specification

- Degree in Computer Science, Software Engineering, Computer Engineering or related field.
- 5-7 years of Mobile Application Software Development.
- 3-5 years of React for mobile iOS and Android.
- Experience with Microsoft application development and testing frameworks.
- Proficiency in JavaScript and React ecosystem.
- Strong understanding of cross-platform mobile development.
- Experience using Bluetooth communication integration.
- Willingness to travel occasionally if required.

Reporting structure

Mobile Application Developer–VP Global Engineer

A position profile does not imply that the duties stated are the only ones to be performed by the incumbent. Employees will be required to follow any other reasonable job-related instruction as requested by their manager or a company director.
